EXPERIENCE

Front-end Developer

Domvs-iT, São Carlos, SP, Brazil, July 2021 – present

- Designed and implemented the company internal web site along with Figma and Jira software integrations using React.Js framework and AWS;
- I had the opportunity to work with a German company and I worked in a hybrid squad with people of many nationalities, such as Pakistan, India, Mexico and the United States.
- I developed, using flutter, a personal application that is a virtual bank, with user page, login, user validation and unique design made by me.
- In all projects I used the agile methodology called Scrum and we used to do all your ceremonies like daily, planning,

Project Manager

Toniolo Joias, Dracena, SP, Brazil, Apr 2020 - Mar 2021

- I developed and led the entire project for this company. The project consisted of developing a jewelry ecommerce for this company, using wordpress and woocommerce plugin.
- After the completion of this project, we decided to invest in advertisements like google and facebook ads to increase the visualization of our site. With that, we were able to achieve more than \$10k in sales.
- In addition to investing in paid traffic, we optimize the page's SEO to increase its organic traffic
- As wordpress technology was used to develop this e-commerce, I also used my knowledge of HTML5, CSS3 and SASS.
